

FleetNav™ Alert

Gain Insight & Monitor Your Out-of-Route Drivers

Monitoring your fleet's performance and out-of-route drivers while minimizing your per-mile operating costs, is critical to the success of your business. FleetNav™ Alert, Maptuit's tracking and reporting service, gives you a real-time view into your fleet's activity, and the capability to compare current and past performance. FleetNav Alert will send a real-time alert via email or breakscreen to the dispatcher or driver manager anytime a driver "significantly" deviates from the planned route. Your dispatch managers can also see the location of each vehicle in your fleet, the history of arrival and departure times for each stop, and whether your drivers are on-track to arrive at your customer on time.

Maptuit's FleetNav™ Alert gives you real-time and total visibility into all aspects of your fleet operations, helping you track trends, take immediate corrective actions and continually measure the success of your fleet operation.

Maptuit FleetNav™ is the only real-time solution that leverages the industry's best-in-class routing, along with the nation's most-up-to-date truck-specific dynamic road network. As a result FleetNav realizes significant cost savings from the reduction of accidents alone.

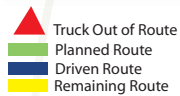

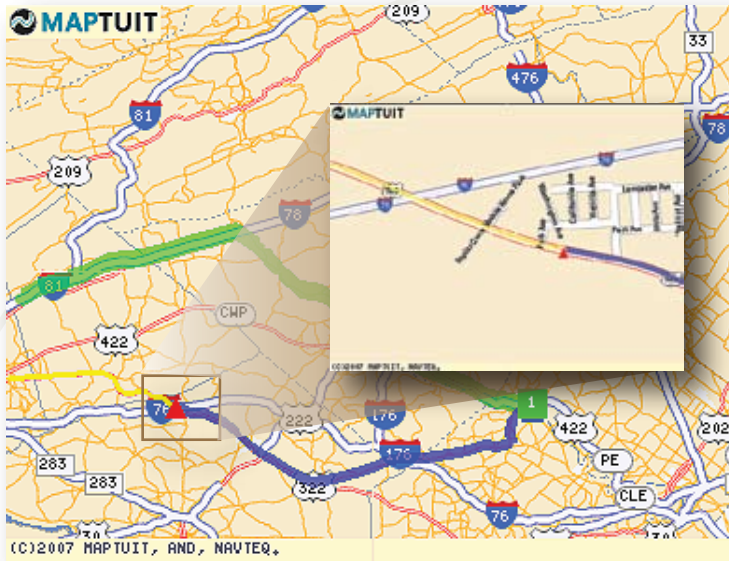

- Know where your fleet is and what they are doing
- Find the most efficient, on-time route for your drivers
- Improve Your Delivery Times & Customer Service
- Reduce out-of-route miles
- Identify your best performers
- Save time and Money
- OoR real-time notification via email

Where are your fleet drivers right now and what are they doing?

Nothing is more powerful than knowing what your fleet is doing 24/7!

Do You Know Where Your Drivers Are?

Area of interest shows the distanced traveled and the current location where the driver went out of route.

JOIN OUR COMMUNITY OF DRIVERS

The Maptuit Community, today comprised of over 80,000 professional drivers, is a key element in helping Maptuit keep the nation's best truck-specific road network up-to-date. Drivers can use their onboard computer to submit information about road conditions that will affect other drivers. When that occurs Maptuit will update it's servers making that new information immediately available to all FleetNav™ and NaviGo™ users.

RELY ON A DYNAMIC ROAD NETWORK

Navigation of any kind should be based on the most accurate and constantly updated data available. Maptuit's dynamic road network is updated in real-time. Our competitors may update their road network on a quarterly basis.

Know How Your Fleet is Performing

FleetNav Alert is a management portal that gives you total visibility into all aspects of your fleet operations:

- Monitor the progress of your fleet in real-time
- Quickly identify where your trucks are
- Know when corrective measures are needed
- Determine your best performers by driver manager and by driver
- Track trends on critical business metrics
- Measure the success of your fleet operations

Improve Efficiency of Operation

View and manage your entire fleet proactively with FleetNav Alert. By accessing this web portal, driver managers can quickly:

- Determine if your drivers are taking the least-cost route
- Know when your drivers will be arriving at your customers
- Assist drivers when they need help
- Improve safety
- Reduce costs
- Increase customer satisfaction

Quality Customer Service

- 24x7 customer support
- Extension of your team
- Weekly status reports
- Multiple collocate facilities for redundancy

Best Road Network Data

- Over 40 Million Roads
- Multiple data sources
- Based on actual driving of roads, aerial photography, and survey data
- Updated in real-time

Flexible ASP Model

- Access via web browser
- Flexible & Customizable by driver, fleet, sub-fleet and operator
- Integrates with existing systems
- Real-time monitoring

Proprietary Truck Data

- Data for the 53' trailer
- Height & Weight restrictions
- Over 16,000 toll roads

USE COMMERCIAL GRADE ROUTING

It is physically impossible to generate a high quality truck route with the limited power of an onboard device. Maptuit addresses this shortcoming by utilizing hundreds of servers to calculate the industry's most sophisticated truck routes and then delivered to your driver via your dispatch system. Maptuit has the largest and most-up to date collection of truck specific road data in the industry. Just ask the four largest fleets in the county, all of whom have chosen our product for that very reason
