

FleetNav™ Directions

Accurate Truck Directions on Demand

FleetNav Directions helps your drivers get to their final destinations safely, on time and at the lowest possible cost. Seamless integration with your dispatch system means drivers can request directions from where they are to where they need to go - be it a pick up, drop-off, fuel stop, or any other waypoint- directly from their cab. FleetNav Directions leverages the industry's most accurate model of the road network, and is optimized for heavy trucks. By providing least-cost routes, FleetNav Directions helps you minimize operational costs while improving on-time service to your customers.

- Increase Your Driver & Equipment Safety
- Improve Your Delivery Times
- Improve Customer Service
- Differentiate From Your Competitors
- Integrates easily Into Dispatch System

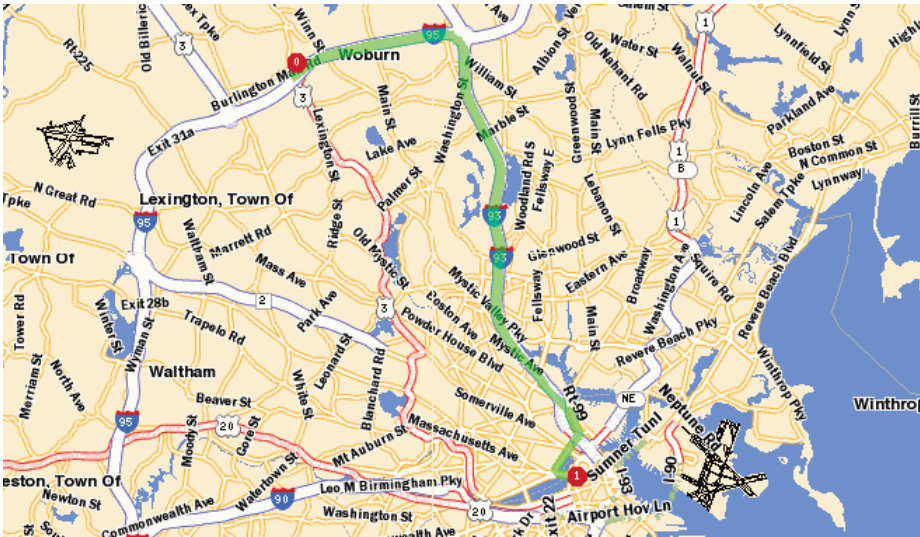

Maptuit FleetNav™ is the only real-time solution that leverages the industry's best-in-class routing along with the nation's most up-to-date truck-specific dynamic road network. As a result FleetNav realizes significant cost savings from the reduction of accidents alone.

Maptuit's best-in-class truck routing and dynamic turn-by-turn directions make FleetNav Directions the choice for trucking companies.

**So many roads, bridges, risks and hazards.
How does each one affect your bottom line?**

Accurate truck approved routing eliminates dead-end streets, dangerous U-turns and avoids truck restrictions

JOIN OUR COMMUNITY OF DRIVERS

The Maptuit Community, today comprised of over 80,000 professional drivers, is a key element in helping Maptuit keep the nation's best truck-specific road network up-to-date. Drivers can use their onboard computer to submit information about road conditions that will affect other drivers. When that occurs Maptuit will update it's servers making that new information immediately available to all FleetNav™ and NaviGo™ users.

- Height & Weight restrictions
- Over 16,000 toll roads

RELY ON A DYNAMIC ROAD NETWORK

Navigation of any kind should be based on the most accurate and constantly updated data available. Maptuit's dynamic road network is updated in real-time. Our competitors may update their road network on a quarterly basis.

USE COMMERCIAL GRADE ROUTING

It is physically impossible to generate a high quality truck route with the limited power of an onboard device. Maptuit addresses this shortcoming by utilizing hundreds of servers to calculate the industry's most sophisticated truck routes and then delivered to your driver via your dispatch system. Maptuit has the largest and most-up to date collection of truck specific road data in the industry. Just ask the four largest fleets in the county, all of whom have chosen our product for that very reason
